PEARLWATER MINERALQUELLEN

Pearlwater bottles around 100 million litres of mineral water and soft drinks a year, including the Coop own-label brands Swiss Alpina, Aquina and Prix Garantie. The water comes from four premium-quality Alpine springs in Valais with different mineralizations.

Vision
We ensure long-term use and availability of sources in order to sell an impeccable range of products in line with current trends. We bottle highly mineralized water and soft drinks with different mineralizations from water in the Valais Alps. A high degree of automation and a lean product range gives us flexibility. Our commitment to people and the environment is a component of our daily work (carbon-neutrality, recyclable bottles, waste recycling). Our comprehensive and constantly updated knowledge of water production and bottling makes us specialists in the industry.

Sustainability achievement
99% of the volume is transported by rail; 30% recycled materials for all PET bottles; reduction of bottle thicknesses to use less PET material; reduction of secondary packaging to reduce waste; separation and treatment of waste water from production
